-Identifying Cameras

Are you fascinated by CCTV's?

When you see them watching you? Do you want to understand them more? CCTV watching is an increasingly popular pastime that can enrich your knowledge of cameras and technology, relax you and help you bond with other enthusiasts. All you need is yourself, an urban Environment, and a willingness to observe. You don't need fancy binocular equipment to start watching CCTV's. Anything that will help you see far away will work in the beginning.
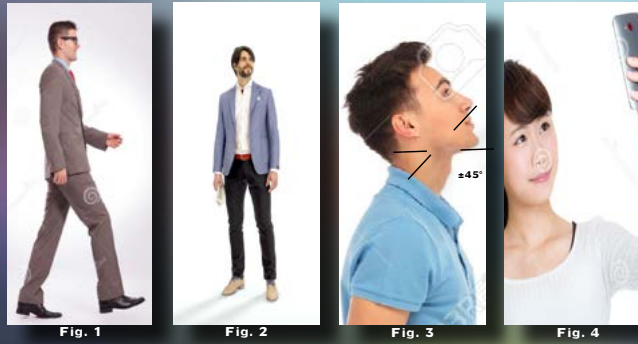

MOST COMMON SPECIES

"Bullet"

"Dome"

Preparing to Spot

Fig. 1   Fig. 2   Fig. 3   Fig. 4

Fig. 1   Walk normally. Look at the surrounding enviroment.

Fig. 2   When you detect a CCTV, stop and stand quiet

Fig. 3/4   Tilt your head upwards by about 45 degrees and fix the camera. Enjoy the view, and take a picture and post it on Instagram.

Dont's

-Identifying CCTV's

Check for any labels or stickers located on the devices in question. If you're able to locate the brand name, that will also help to narrow things down. If you're able to find these, use the power of the internet to attempt to locate the seller and have them help you identify the cameras.

TO POST ON INSTAGRAM

1. Take a picture of cameras with your smartphone (enable <<geotag>>)

2. Post it on Instagram with the hashtag **#cctvwatchingsdigst**

or

send it to **@cctvwatchingsdigest** (IMPORTANT: please let us know where and when you spotted the cctv)
